# FIKRE KINDEYA

## FULL-STACK DEVELOPER

### ABOUT ME

I am a passionate Full Stack Developer who transforms ideas into fully functional, user-friendly, and visually appealing digital solutions. Skilled in front-end and back-end development, I combine clean code, modern design, and problem-solving skills to deliver impactful web applications. With experience in HTML, CSS, JavaScript, React, Nodejs, databases, and API integration, I take projects from concept to completion with efficiency and creativity.

### WORK EXPERIENCE

#### Full Stack Developer

##### Personal Projects | Jan 2024 – Present

- Designed, developed, and deployed multiple responsive web applications from concept to completion.
- Applied full stack development skills in HTML, CSS, JavaScript, React, Nodejs, Express, and Firebase to create dynamic and scalable solutions.
- Integrated APIs, optimized performance, and ensured mobile-friendly user experiences.

##### Key Projects:

- Amazon Clone – E-commerce platform with product listings, cart functionality.
- Netflix Clone – Movie streaming interface with category-based content display using React and The Movie Database (TMDB) API.
- Apple Clone – Responsive, pixel-perfect replica of Apple's homepage featuring animations, sliders, and modern UI components.

### EDUCATION

#### Addis Ababa University /2023-2027

Bachelor of Science in Economics
